

# **ENGLISH LANGUAGE** Sample Assessment Paper for Admission to Grade VI

## **COMPREHENSION**

Time: 20 minutes

## Read the passage carefully.

Luke's pet spider "My pet is a spider. He's called

Dizzy. My mum found him under my bed and I rescued him." There was a silence. Luke sat down at his desk again.

"Is that all, Luke?"

"Yes, Miss." There wasn't really anything else to add about Dizzy. Luke had only rescued him that morning, just before school. Everyone had been told to write a piece about their pet or a neighbor's pet. Luke's neighbor was the old lady who owned the flat where Luke and his mother lived. She had the downstairs flat which she shared with a mangy and smelly old dog. That was why she wouldn't allow Luke to have any pets. Luke didn't want to write about the old dog and up until that morning his notebook had been blank. Then he had found Dizzy.

Luke added, "But I've brought Dizzy to show everyone." He took a shoebox from under the desk and opened the lid carefully. Three hairy legs dangled over the side of the box, and Luke quickly shut it again.

Mrs. Matthews shuddered. "I think that's enough, Luke," she said. "And I think you should let Dizzy free after the lesson. It isn't very kind to keep a spider in a box."

### Answer the following questions.

1	• Who was Luke talking to at the beginning of the passage?	/1
2	• How did Luke get his spider?	/1
3	• Why wouldn't the lady who lived downstairs let Luke have a pet?	/2
4	• Why do you think Mrs. Matthews shuddered when she saw the spider's legs?	/2
5	• Find and write any two adjectives used to describe the dog from the passage.	/2

#### Q5. Choose and write the correct contextual meanings for the words given below. /2

rescued	dangled
saved	kicked fiercely
received	crept slowly
arranged	hung loosely

## Read the passage carefully.

## Mrs. Cockle

Old Mrs. Cockle lived at the top of a very tall house in London. Most of the people who knew her were sorry for her, because she had to climb eighty-four stairs before she reached her own front door; but she did not mind. It is true that all that climbing made the backs of her knees ache, but then there were advantages.

Mrs. Cockle lived so high that, from her window, she had a view of the sky over the top of the tall house opposite – which was more than most people, had. In the mornings she could look out and think, the sky is blue all over – I'll wear my woolen shawl today; or, the sky has clouded right over – I'll take my biggest umbrella. Mrs. Cockle had three umbrellas for different weathers, and the biggest of the three was larger than umbrellas are ever made nowadays.

There was another advantage for Mrs. Cockle in living at the very top of the house. In the middle of her ceiling there was a trapdoor, and, if she set up her step - ladder underneath it, she could climb up, open the trapdoor, and climb through on to the roof itself.

#### Answer the following questions.

Q1. Where did Mrs. Cockle live?	/1
Q2. What happened to Mrs. Cockle when she climbed eighty-four stairs?	/1
Q3. Why did Mrs. Cockle like living at the top of the house? Give any two reasons.	/2
Q4. What did Mrs. Cockle wear when the sky was blue?	/2
Q5. What did Mrs. Cockle wear when they sky was white?	/2

Q6. Choose and write the correct contextual meanings for the words given below.

advantage	bonnet
benefit	a woman's hat with strings
concern	a woman's dress
problem	a woman's glasses

# Q6. Use any two of the following words in sentences of your own.

## reached high nowadays

# **COMPOSITION:**

Write a composition of three paragraphs (150-200 words) on the following topic.

# Picnic at the Beach

12

Write a composition of two paragraphs on the following topic.

# The Book I enjoyed reading

# MATHEMATICS

## Sample Assessment Paper for Admission to Grade VI

## A. Mental Math

Time: 20 minutes Max. M: 10

- i. What is the product of 8 and 100?
- ii. Circle the numbers which are exactly divisible by 7.

287, 144, 48,281, 147 iii.  $1\frac{1}{4} + \underline{\phantom{0}} = 2\frac{1}{2}$ 

iii. All three sides in \_\_\_\_\_\_triangle are equal.

## **B. Word Problems**

## Attempt the following questions and write answer statements where required.

- 1. A bag of sugar weighs 4½ kg. If a chef needs 14 kg of sugar, how many bags should she buy? How much sugar will be left over?
- 2. Ali received Rs. 1,064 as Eidi. He wants to buy a set of books which costs Rs. 2000.

a. Round off 1,064 to the nearest 100.

- b. How much more money does Ali need to buy the set of books?
- 3. Mrs. Raza baked 15 cookies for a bake sale. She sold each for Rs. 43 and deposited the amount in the charity box. How much did she deposit in the box?

A. Mental Math

- ii. Write 2 and a half million in numbers.
- iii. The value of 4 in 60470 is
- iv. Write the first five multiples of 8.
- v. Write <sup>3</sup>/<sub>4</sub> as a decimal fraction.

## **B.** Solve

## Attempt the following questions and write answer statements where required.

- 1. Find the area and perimeter of a rectangle with length 8cm and breadth 5 cm.
- 2. Osama started his homework at 4.30 pm and finished at 5.20 pm. His sister Salma began her homework at 4.50 pm and finished at 5.25 pm.
  - a. How much time did each child spend on homework?
  - b. Who spent more time?
- 3. A carton containing science books weighs 50kg.
  - a. How much will 19 such cartons weigh?
  - b. The cartons were carried to a library on a lorry but one carton was left behind by mistake. What is the weight of the boxes which are on the lorry?
