#### Sample Assessment Paper for Admission to Grade IX

#### Part A: Reading

#### Read the passage and answer the questions that follow.

The worst days of any summer are the rainy ones. We spend all year looking forward to nice weather and long, hot days. All of winter, with its dreary gray days and **bitter** cold, we dream of those endless days at the beach, laying on the sand and soaking in the bright and burning sun. And then, summer comes, and it rains.

As a child, I would wake up to rainy summer days and come close to crying. It wasn't fair. We suffered through months of school and miserable weather for those **scant** ten weeks of freedom and balmy weather. Any day that I could not spend at the beach or playing ball with my friends seemed like a punishment for something I didn't even do. On those rainy summer days, I had nothing fun to do and could only sit inside, staring out at the rain like an orphan. I was an only child, so there was no one else to play with. My father worked from home, so I was not truly alone, but he could not actively play with me since he was technically at work. It was those days that I would resign myself to whatever was on television or any books that I could find lying around. I'd crawl through the day and pray each night that the rain would not be there the next day.

As an adult, though, my opinion of summer rain has changed. When you have to work every day, summer is not as eagerly **anticipated**. Mostly, the days run together, bleeding into each other so that they no longer seem like separate entities and instead feel like continuations of the same long day. Everything seems **monotonous** and dull, and an ennui or listlessness kicks in. Such a mindset makes you cheer for anything new or different.

I spend the winter dreaming of summer and the summer dreaming of winter. When summer comes, I complain about how hot it is. And then I look forward to the rain, because the rain brings with it a cold front, which offers a **reprieve**—admittedly one that is all too short—from the torture of  $100^{\circ}$  and humid days. Rainy days are still the worst days of the summer, but summer rain today means positively beautiful—and considerably cooler—weather tomorrow.

Q1. According to the author, what makes him or her wait for summer?			(/1)	
Q2. Mention on	e activity that the au	thor liked the m	ost to do during summe	r. (/1)
Q3. According t	to the passage, why is	s summer differ	ent for adults?	(/1)
A. He or sh B. He or sh C. He or sh D. He or sh	e was often bored on a e preferred cooler wea e liked staying indoor e had no siblings.	summer days. ather. s. ribes why he or		vard to summertime the way
Q6. Circle the c	orrect meaning of th	e given words.		(/5
<ol> <li>bitter</li> <li>unpleasa</li> </ol>	nt b. sweet	c. hostile	d. friendly	
2. scant a. tasty	b. limited	c. fun-filled	d. busy	
<ol> <li>anticipated</li> <li>long</li> </ol>	b. discussed	c. packed	d. expected	
4. monotonous	s b. dull	c. happening	d. exciting	
5. reprieve a. break	b. argument	c. compact	d. tiring	

# Part B: Writing

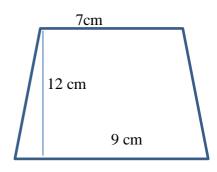

Q. Write a story in which a lost key plays an important role.	Word count: 250	(/10)

#### **MATHEMATICS**

#### Sample Assessment Paper for Admission to Grade IX

Q1. Simplify: (/3)

- a.  $28 + 24 \times 2.5 6$
- b. 38.5 + 29.5 x 14
- c.  $-36 \div (-4) + 36 \times (-1.5)$
- Q2. A piece of string is cut into two parts in the ratio 6:5. If the length of the shorter piece is 40cm, find the length of the longer piece. (/3)
- Q3. A cube of mass 12kg has a volume of 343cm<sup>3</sup>. Find:
  - a. The length of its edge (/2)
  - b. Its surface area (/2)
  - c. Density (/1)
- Q5 Find the area of the following figure: (/4)

- Q6. A man walks at an average speed of 1.25m/s. Find the time he takes to walk 3.75 m. (/2)
- Q7. Solve simultaneously (/3)

$$2x + 4y = 8$$

4x + 6y = 14

#### **SCIENCE**

#### Sample Assessment Paper for Admission to Grade IX

#### **Physics**

- 1.A block of wood has a volume of 20cm<sup>3</sup> and a mass of 180g.
  - a) Calculate the density of the block of wood. (Show all steps).

Formula:

$$Density = \underline{\hspace{1cm}} (/2)$$

b) The block is held just above the surface of a liquid of density 0.88g/cm<sup>3</sup>. Predict and explain what happens (sinks or float) when the block is released.

\_\_\_\_\_(/1)

2. Calculate the resultant force?

Finet A = Finet B = (/2)

3. Fig. 3.1 shows a student standing on soft sand. The student does not sink into the sand.

Fig. 4.1

The student has	a mass	of 40 kg.
-----------------	--------	-----------

a) Calculate the force of her body acting on the sand.

$$Force = \underline{\hspace{1cm}} \tag{/1}$$

The total area of both her shoes in contact with the sand is 0.2 m<sup>2</sup>.

b) Calculate the pressure the student exerts on the sand, when standing as shown in Fig.4.1.

c) Figure shows an instrument.

(/2)

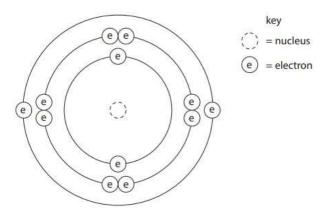

Write down

Name of instrument	
What it measures	
Unit	

## **Chemistry**

Q1. The diagram shows the electronic configuration of an atom of element X.

How many protons does the nucleus of this atom contain?	(/	/1)
• •		

To which group of periodic table does this element belong? Give a reason for your answer. (/2)

Q2. Look at the information about a chlorine atom and an oxide ion.

(a) Complete the table to show the number of protons, neutrons and electrons in each particle.

Two have been done for you.

	Chlorine atom, C1	Oxide ion, O <sup>2-</sup>
Number of protons		8
Number of neutrons		
Number of electrons	17	Na

[3]

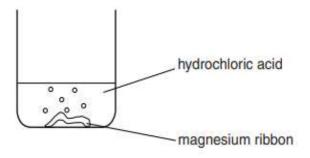

(b) Chlorine has the electronic structure 2.8.7.

Chlorine, Cl<sub>2</sub>, is a covalent molecule.

Use the 'dot and cross' model to describe the bonding in a molecule of chlorine,  ${\rm C}l_2$ . You only need to draw the outer shell electrons.

Q3. Rachel investigates the reaction between magnesium and hydrochloric acid.

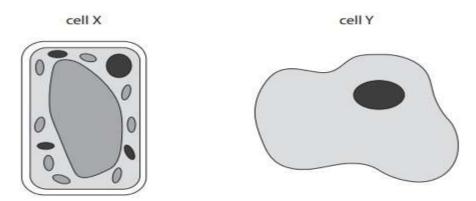

She adds a piece of magnesium ribbon to hydrochloric acid in a beaker.

Complete the word equation for this reaction.		(/1)
Hydrochloric acid + Magnesium	_+	
A gas is produced by this reaction. Describe a test for this gas.		(/1)

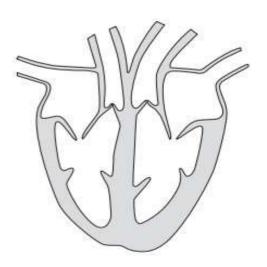

### **Biology**

# Q1. The figure shows two cells.

- a) Which cell is from a plant? \_\_\_\_\_ (/1)
- b) Label three structures, on the diagram, which are present in both the cells. (/2)
- c) Label one structure, on the diagram, that are only present in plant cells. (/1)

#### Q2. Figure shows a heart.

- a) Shade the region of heart that carries oxygenated blood. (/1)
- b) Label the left ventricle. (/1)

# Q3. Photograph shows a locust.

a)	Locusts feed on maize plants and locusts are eaten by lizards. Lizards are eaten by Complete the food chain for these organisms.	by snakes. (/1)
b)	Name the secondary and tertiary consumers in this food chain.	(/1)
c)	Maize plant is a producer. Producers make their own food by photosynthesis. Steequation for photosynthesis.	tate the word (/1)

# **URDU**

## Sample Assessment Paper for Admission to Grade IX

جینر پشزاسکول نموند پرچیدائے داخلہ جماعت نیم سوال نمبرا یہ مندرجہ ذیل عنوان پر ۱۳۵۰ سے ۱۳۵۰ الفاظ پر مشتل مضمون تحریر کریں۔ دردِ دل کے واسطے پیدا کیا انسان کو

,
-
